

AMENDMENTS

In the specification:

Please make the following correction in the paragraph which begins on page 11, line 4:

.... For example, for errors in the transport system, a corrected drive pattern can be produced by programming a device such as a programmable error correction device of the type the ~~Programmable Error Correction PKE 80~~ **PROGRAMMABLE ERROR CORRECTION PKE 80 error correction device**, available ~~from~~ **from** RSF Elektronik, Rancho Cordova, Calif., USA, with measured error data obtained from examining the transport system of the deposition apparatus ~~apparatus~~. A microprocessor which provides the target drive pattern, together with the foregoing programmed device, then operates as a "processor" of the present invention. The programming can be provided remotely to processor 140, or previously saved in a computer program product such as memory 141 or some other portable or fixed computer readable storage medium using any of those devices mentioned below in connection with memory 141. For example, a magnetic or optical disk 324 may carry the programming, and can be read by disk reader 326.
